

Table 1: Difference in differences, Rivera				
	Employment		Hours worked	
	Women	Men	Women	Men
	(1)	(2)	(3)	(4)
Baseline	0.038 (0.015) 6833	-0.045 (0.017) 6089	3.184 (1.366) 6833	1.707 (1.023) 6089
Kids under 14				
Yes	0.026 (0.021) 4703	-0.006 (0.015) 3584	3.062 (1.101) 4703	3.454 (1.444) 3584
No	0.053 (0.027) 2130	-0.094 (0.026) 2505	2.916 (2.294) 2130	-1.017 (1.301) 2505
Married				
Yes	-0.012 (0.019) 3882	-0.006 (0.028) 3126	1.534 (1.432) 3882	3.893 (1.402) 3126
No	0.118 (0.022) 2951	-0.070 (0.039) 2963	5.863 (1.563) 2951	0.397 (1.829) 2963
Over 30 years old				
Yes	0.006 (0.043) 3336	-0.064 (0.034) 2696	1.404 (2.037) 3336	2.928 (1.483) 2696
No	0.074 (0.043) 3497	-0.022 (0.031) 3393	5.011 (1.525) 3497	1.526 (1.681) 3393

Notes: The table reports the interaction coefficients from a difference in differences regression model. We control for time fixed effects, age, marital status, number of people in the household, child presence, household income, and other housing indicators (number of rooms, having sewage, hot water, refrigerator, internet and other alike). Standard errors are clustered at the semester level. The unit of observation is the individual-semester. Our baseline sample is individuals between 16 and 45 years old.
